PROFESSIONAL SUMMARY

Master of Computer Applications student at PES University, specializing in Cloud Computing, with a foundation in software development, full-stack web technologies, database management, and software testing. Experienced in developing web applications using React, TypeScript, Node.js, and PostgreSQL. Familiar with cloud computing, and application security. Seeking entry-level opportunities in Software Development, Cloud Engineering, or DevOps.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript, TypeScript
Frontend Development: React.js, Next.js, HTML, CSS
Backend Development: Node.js
Databases: PostgreSQL, SQL, Supabase, Prisma
Cloud and DevOps: Cloud Computing, Microsoft Azure, Azure CLI, Azure Container Registry, AWS Fundamentals, Docker
Tools and Testing: Git, GitHub,Manual Testing

EDUCATION

Master of Computer Applications (MCA) **Expected July 2027**
PES University, Bengaluru, Karnataka
Currently Pursuing | Specialization: Cloud Computing

Bachelor of Computer Applications (BCA) **Sep 2022 – Aug 2025**
Bengaluru City University, Bengaluru

Pre-University (Commerce) **Aug 2020 – Jul 2022**
Sri Krishna PU College, Bengaluru

SSLC **Jul 2019 – May 2020**
Sri Krishna International School, Bengaluru

PROJECT EXPERIENCE

BORROWBOX – Community Borrowing and Sharing Platform **MCA Major Project (Individual)**

- Developed a community-based rental platform connecting item owners and renters, enabling access to cameras, gaming equipment, and event gear.
- Implemented item listings, category-based search, rental requests, booking management, user messaging, administrator features, flexible rental pricing, and security deposits.
- Integrated Razorpay payments and Google Maps location services. Built using React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, Supabase, and Tailwind CSS; implemented token handling, password hashing, and payment verification.

Online Quiz and Exam Platform

- Developed a web-based platform for creating and managing online quizzes and examinations.
- Implemented question management, quiz scheduling, and automated evaluation functionality.
- Generated examination results and provided performance feedback to support the assessment process.

Virtual Quiz Application

- Designed and developed a responsive quiz application using HTML, CSS, and JavaScript.
- Implemented interactive questions, timer functionality, and question navigation.
- Added automatic score calculation and instant feedback to improve the user experience.

INTERNSHIP EXPERIENCE

Manual Testing Intern **JB Portals**

- Performed manual and UI testing of a cross-platform music application and prepared test cases.
- Identified and documented defects, validated application functionality, and supported issue reporting.

{Cloud Computing Intern and Trainee **InnoKnowvex Edutech Pvt. Ltd.**

- Mastered core cloud architectures and service models (IaaS, PaaS, SaaS), analyzing scalability, high availability, and trade-offs across deployment environments.
- Designed and deployed baseline infrastructure on AWS/Azure, configuring virtual machines, VPC networking, storage buckets, and IAM security policies.

ACHIEVEMENTS AND LANGUAGES

Achievement: Received a Letter of Recommendation from InnoKnowvex Edutech Pvt. Ltd.
Languages: English, Kannada, Telugu, Hindi
